

## Cross-scenario summary

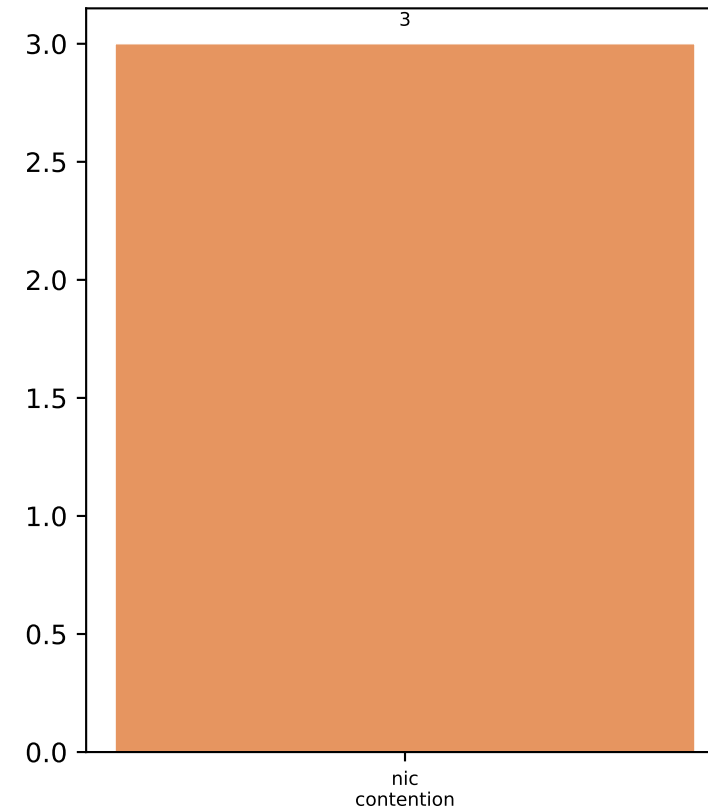

Leader Elections

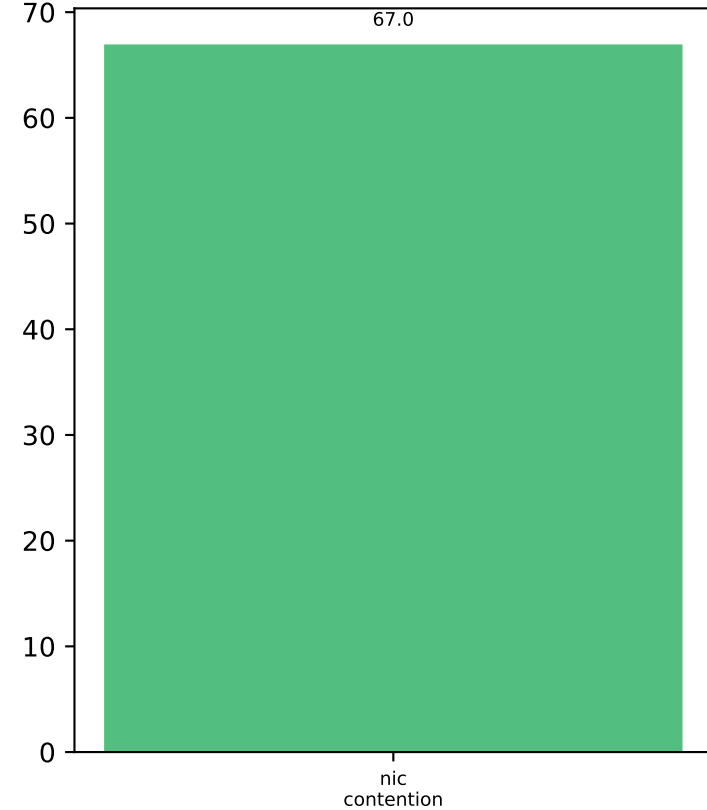

Total HB Failures

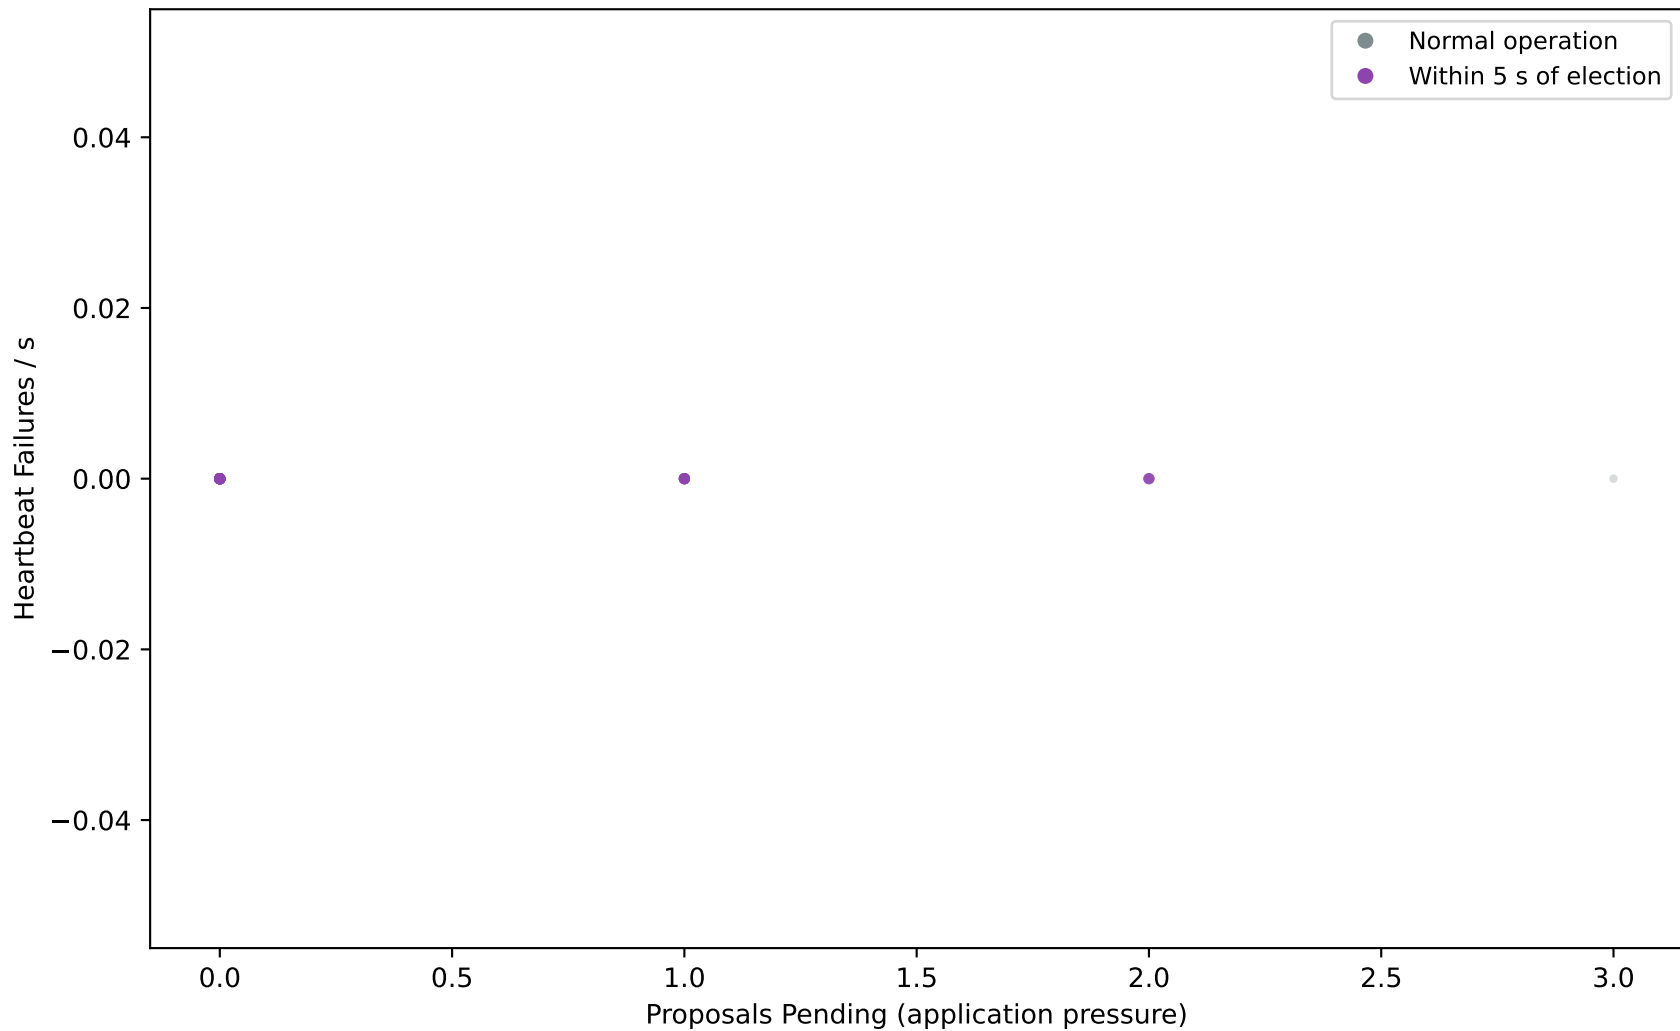

Max Proposals Pending

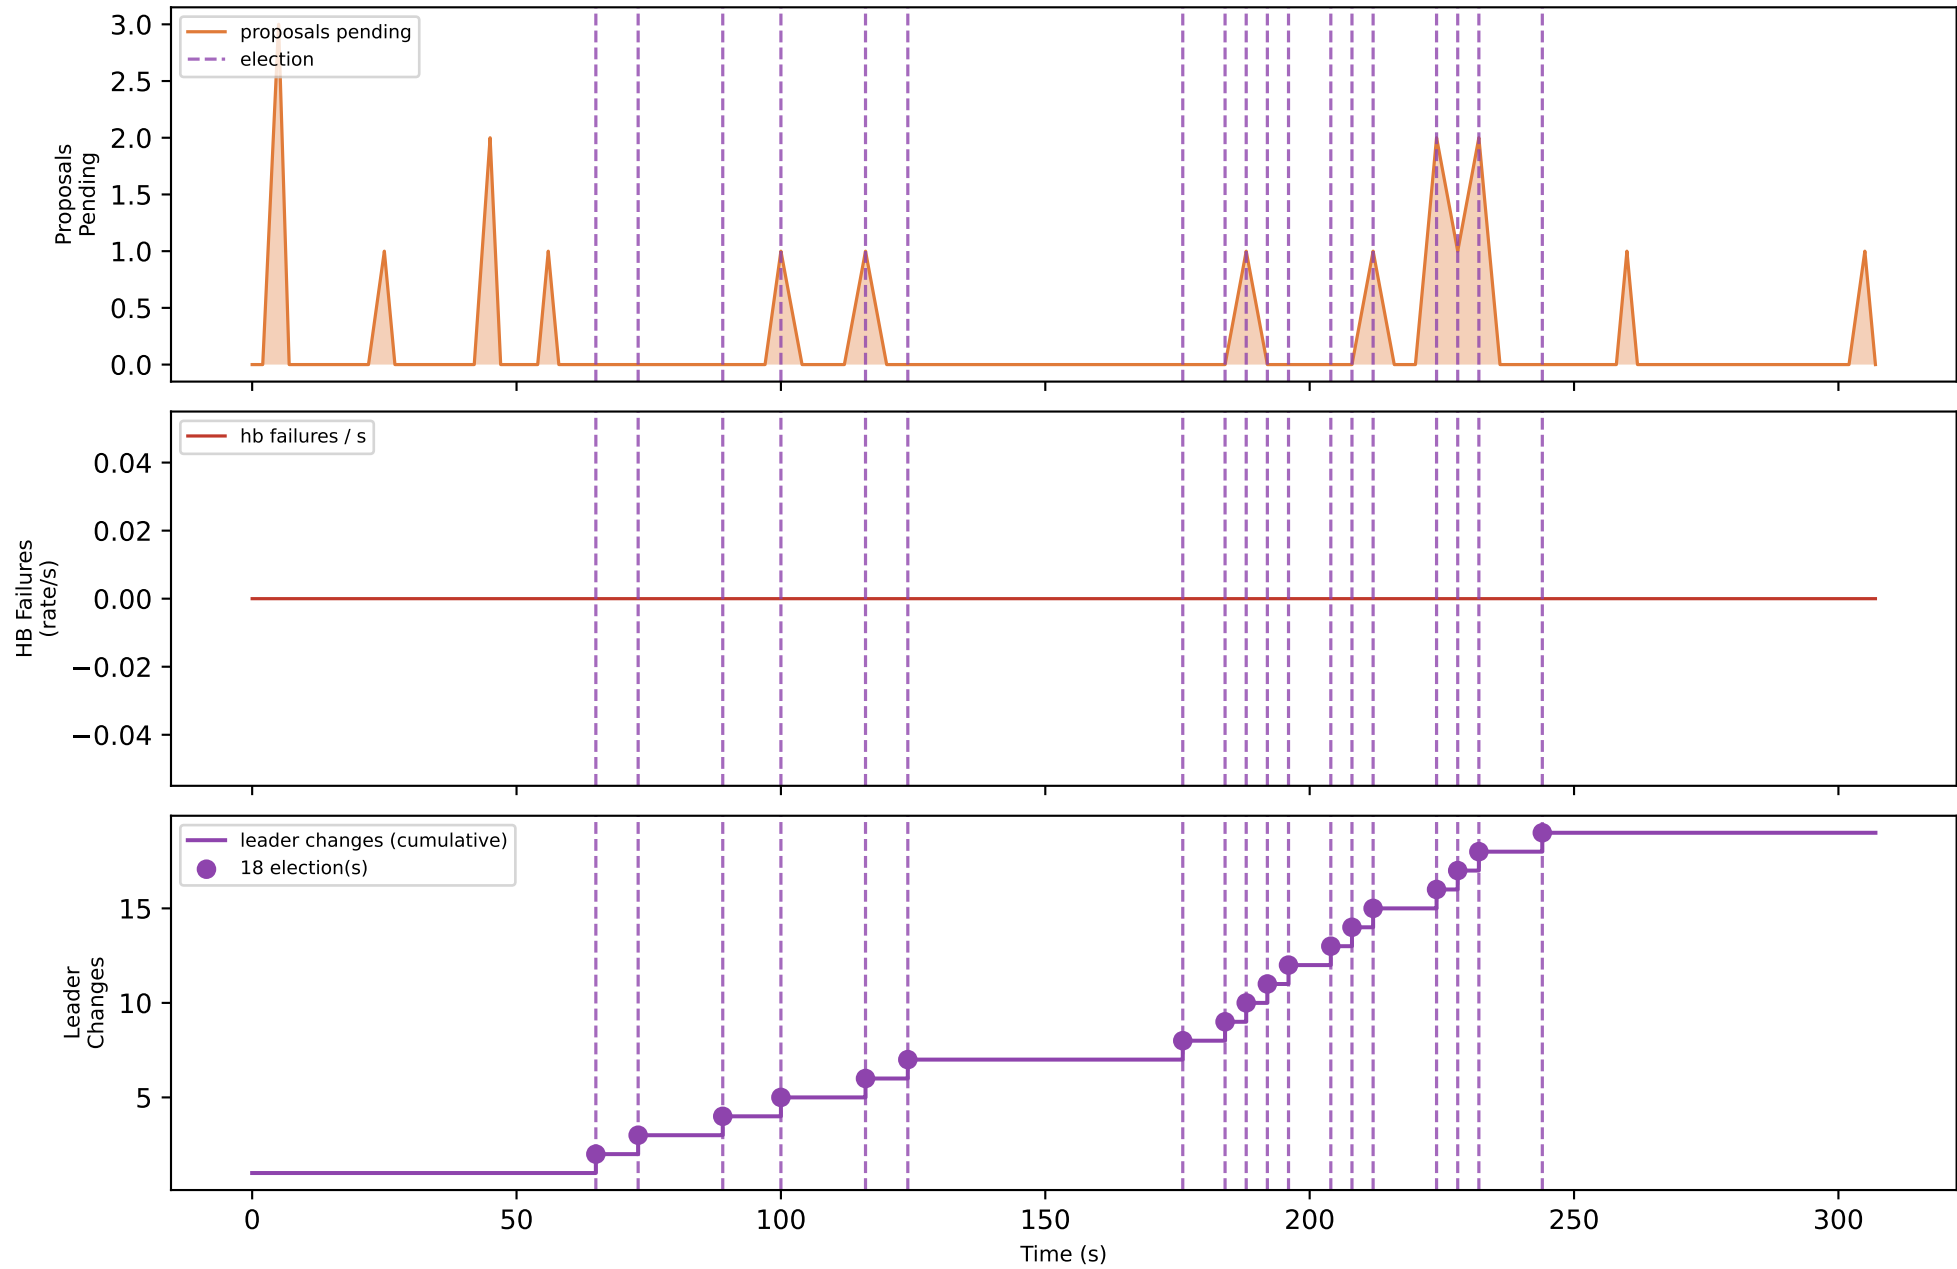

Success Rate (%)

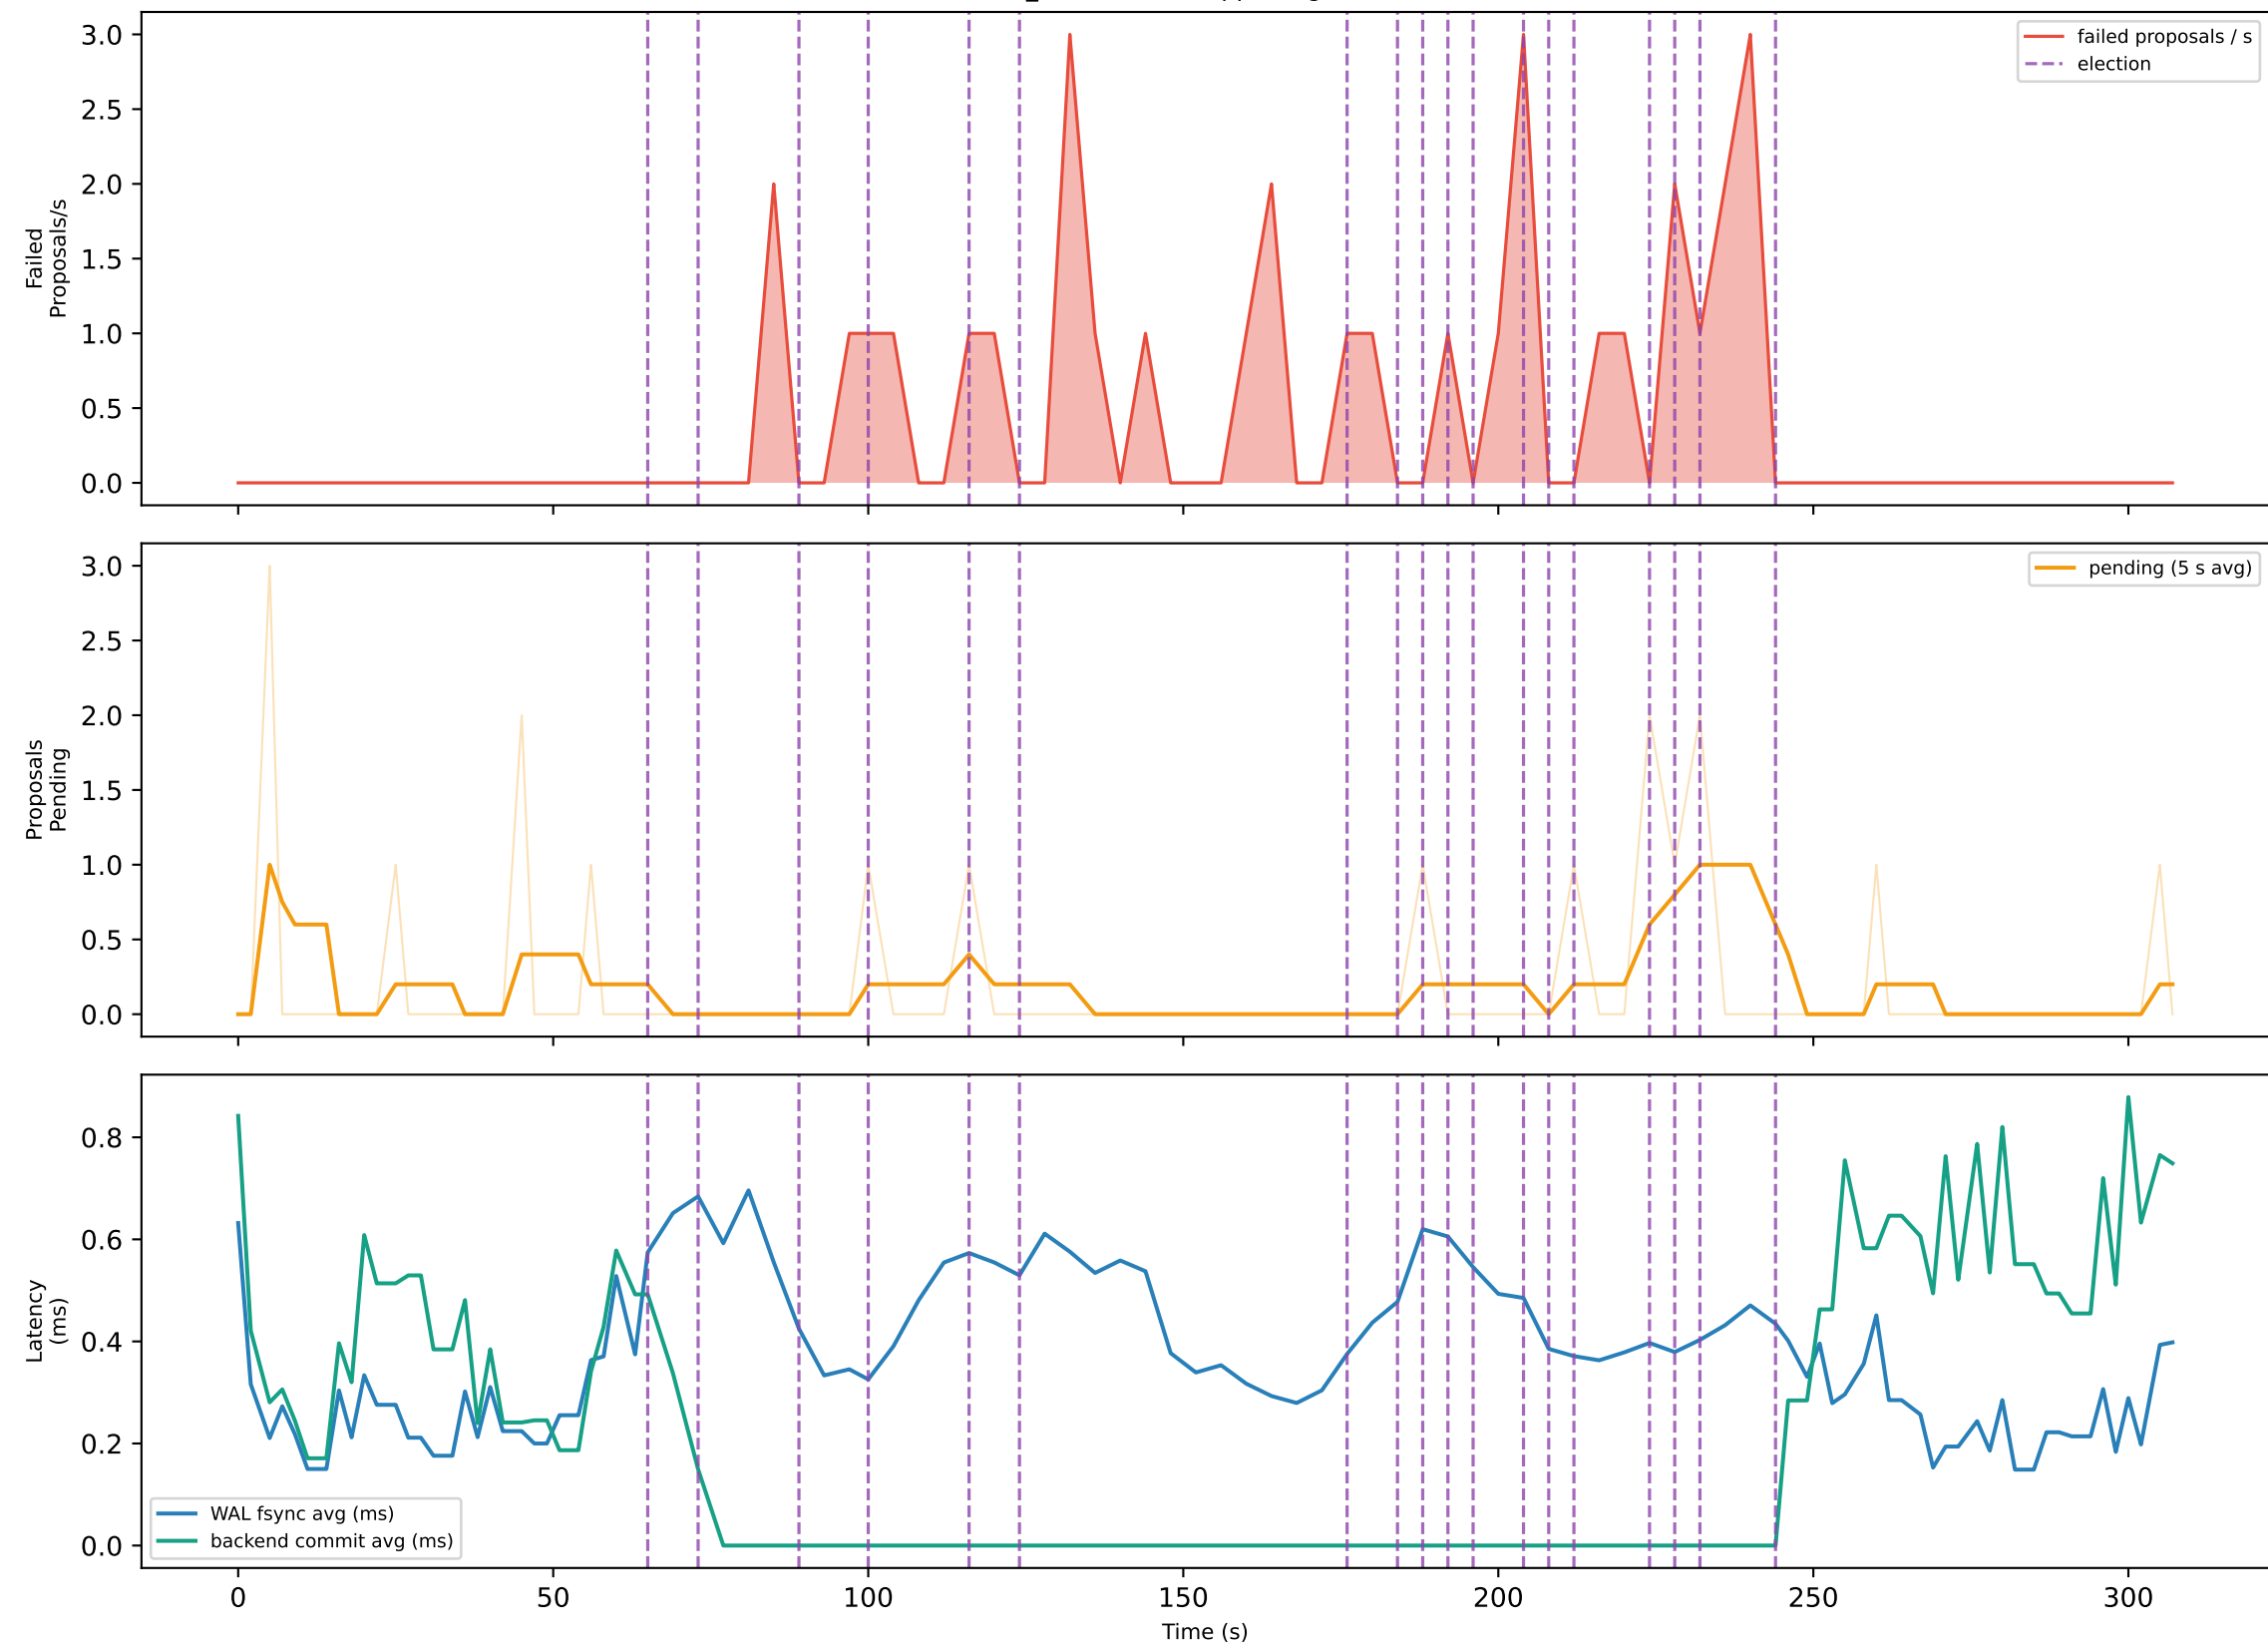

**Application pressure vs heartbeat failures**  
(purple = seconds leading up to a leader election)

nic\_contention

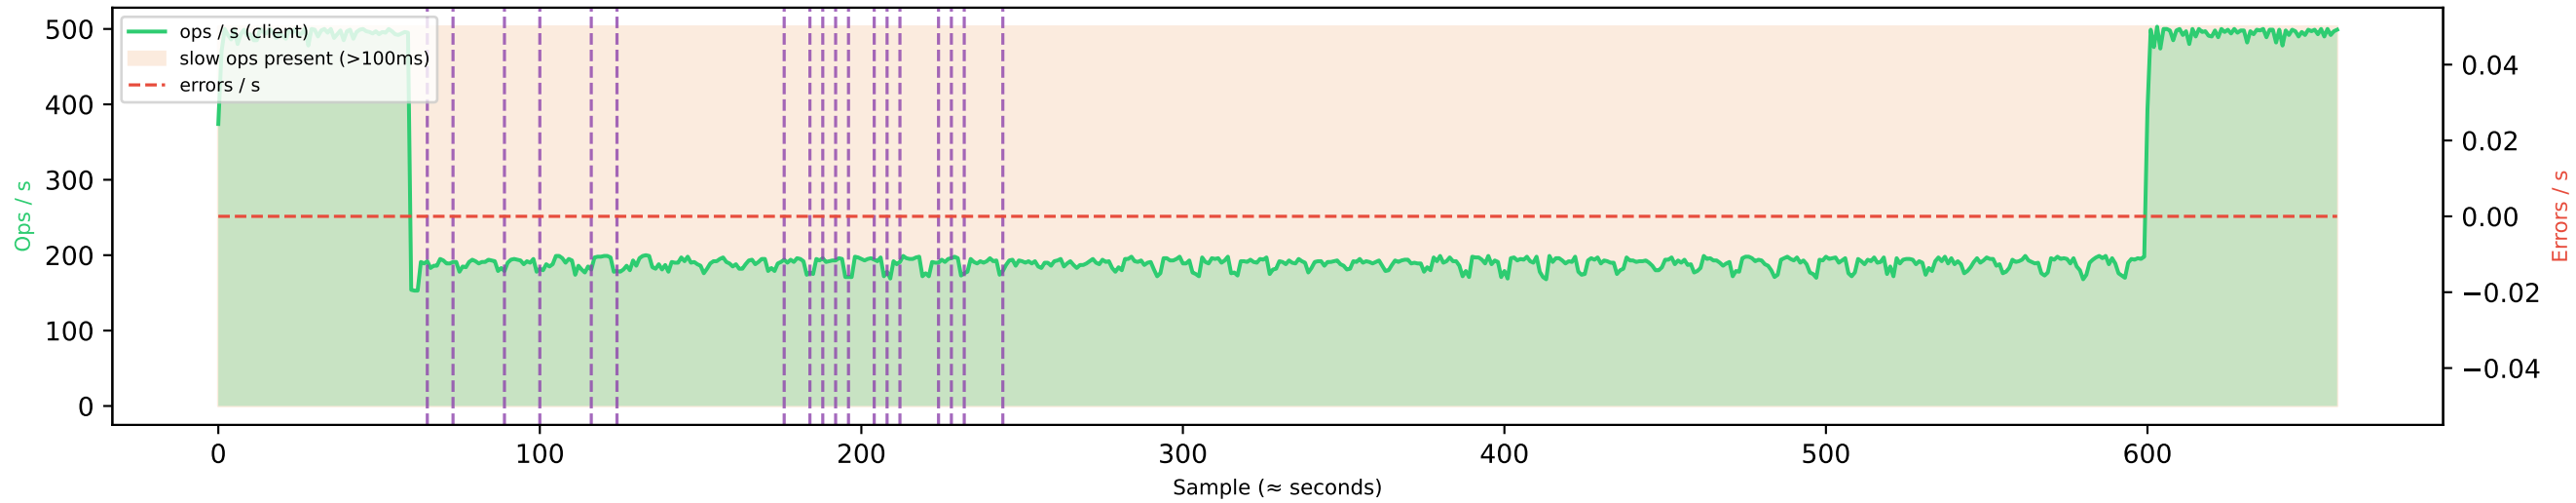

nic\_contention - supporting metrics

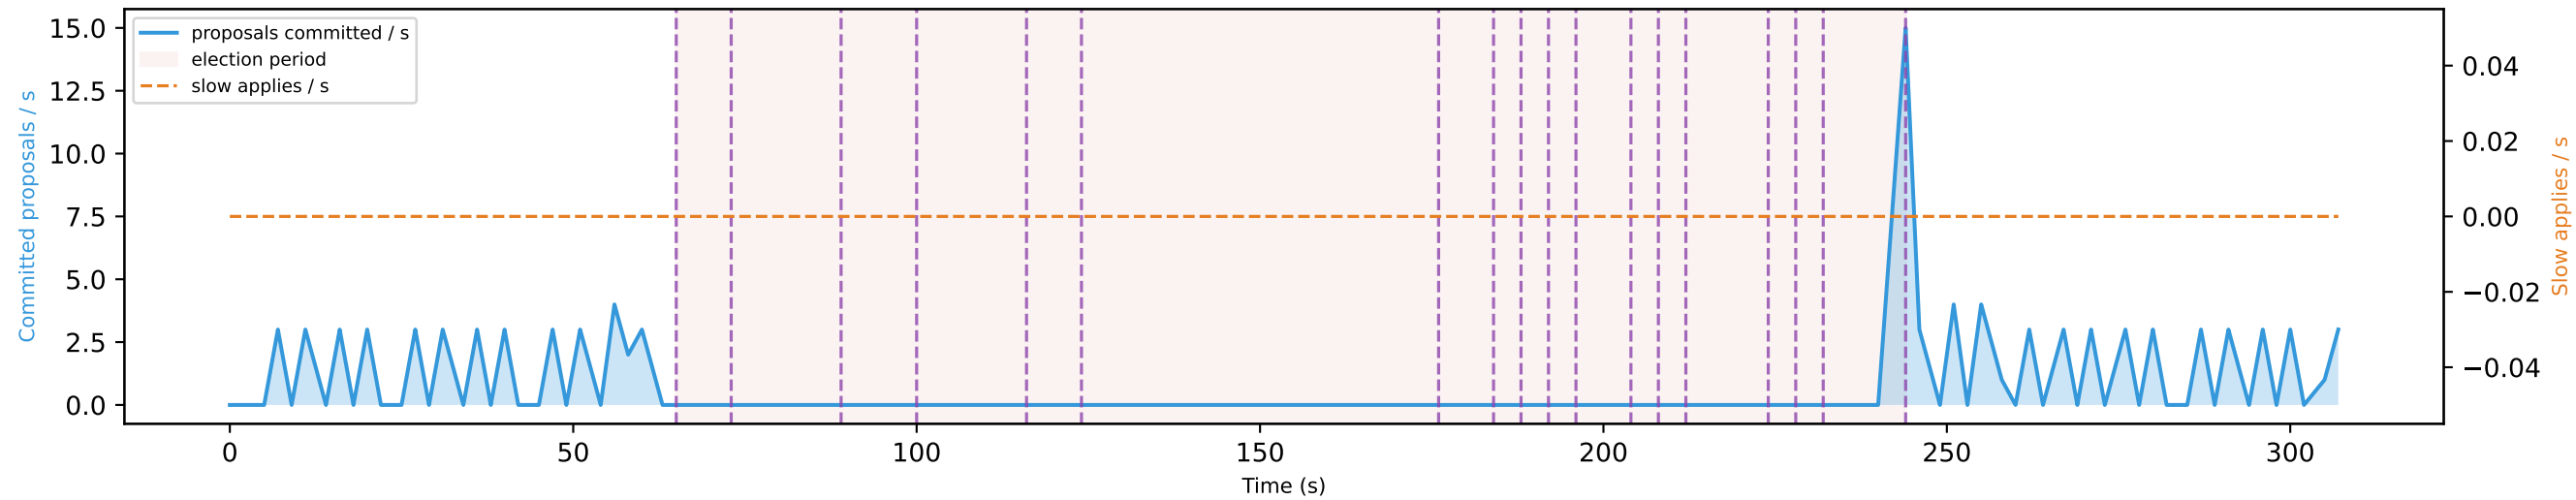

**nic\_contention — throughput & raft performance penalty**  
**(18 election(s) detected — red shading = leaderless period)**

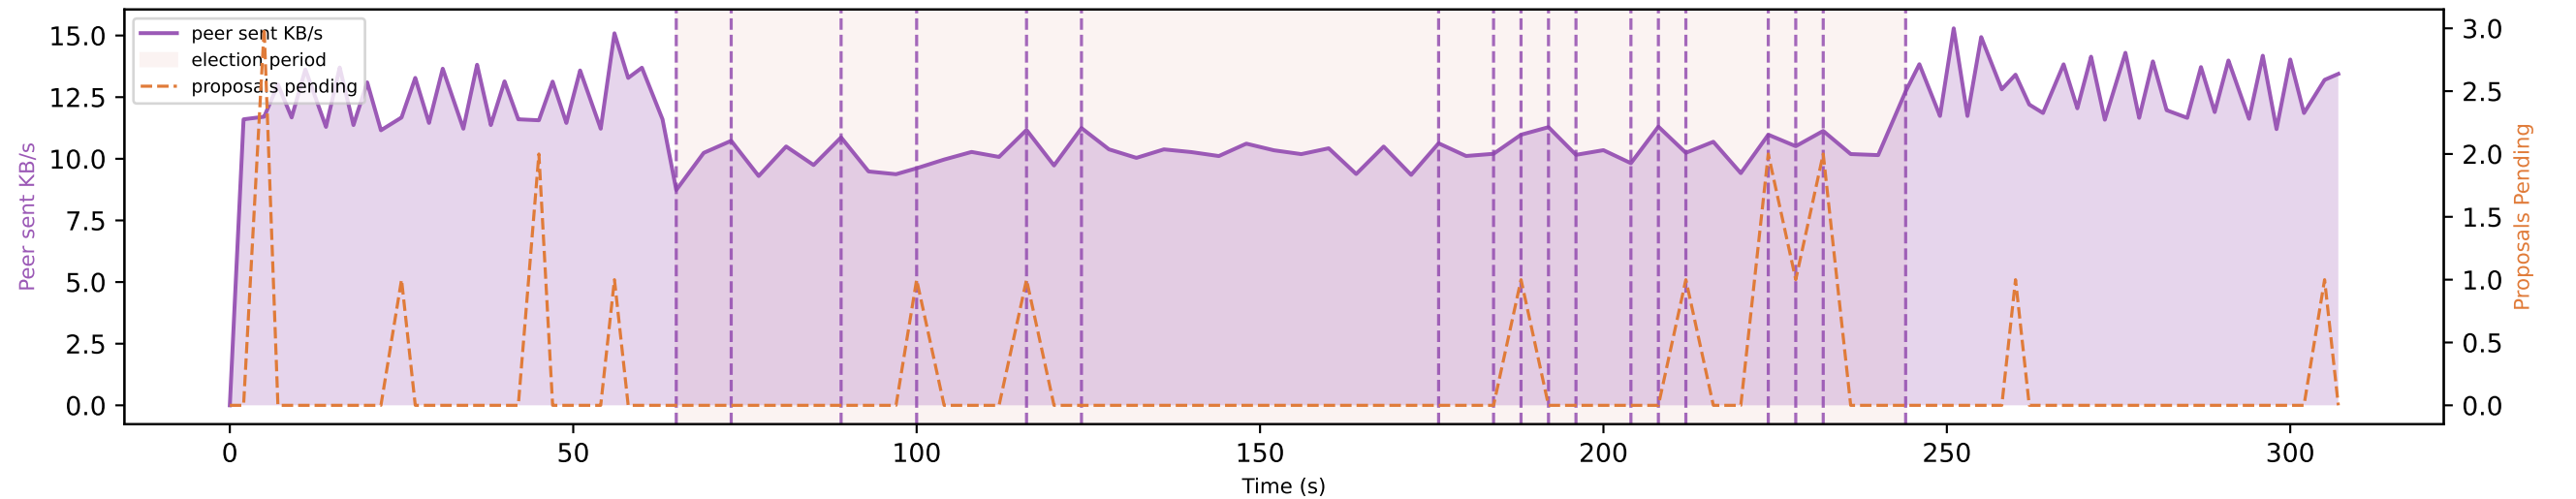

Client-side throughput — drops to zero during elections

Server-side commit rate — confirms writes stall, not just client throttling

Network utilisation — saturated pipeline blocks heartbeats

# nic\_contention — latency vs leader elections (18 election(s))
